ON THE QUESTION OF
THE NATIONAL UNITED FRONT

PYONGYANG, KOREA

1976

1. The first part of the report is a general introduction to the subject of the study.

2. The second part of the report is a detailed description of the methods used in the study.

3. The third part of the report is a discussion of the results of the study.

1. The first part of the paper is devoted to a general discussion of the problem of the existence of solutions of the system of equations

$$\frac{dx}{dt} = f(x, y, z), \quad \frac{dy}{dt} = g(x, y, z), \quad \frac{dz}{dt} = h(x, y, z),$$

where f, g, h are continuous functions of x, y, z and satisfy certain conditions.

2. In the second part we consider the case when the functions f, g, h are linear in x, y, z .

3. In the third part we consider the case when the functions f, g, h are quadratic in x, y, z .

4. In the fourth part we consider the case when the functions f, g, h are cubic in x, y, z .

5. In the fifth part we consider the case when the functions f, g, h are of higher order in x, y, z .

6. In the sixth part we consider the case when the functions f, g, h are of arbitrary order in x, y, z .

7. In the seventh part we consider the case when the functions f, g, h are of arbitrary order in x, y, z .

8. In the eighth part we consider the case when the functions f, g, h are of arbitrary order in x, y, z .

9. In the ninth part we consider the case when the functions f, g, h are of arbitrary order in x, y, z .

10. In the tenth part we consider the case when the functions f, g, h are of arbitrary order in x, y, z .

11. In the eleventh part we consider the case when the functions f, g, h are of arbitrary order in x, y, z .

12. In the twelfth part we consider the case when the functions f, g, h are of arbitrary order in x, y, z .

13. In the thirteenth part we consider the case when the functions f, g, h are of arbitrary order in x, y, z .

14. In the fourteenth part we consider the case when the functions f, g, h are of arbitrary order in x, y, z .

15. In the fifteenth part we consider the case when the functions f, g, h are of arbitrary order in x, y, z .

16. In the sixteenth part we consider the case when the functions f, g, h are of arbitrary order in x, y, z .

17. In the seventeenth part we consider the case when the functions f, g, h are of arbitrary order in x, y, z .

18. In the eighteenth part we consider the case when the functions f, g, h are of arbitrary order in x, y, z .

19. In the nineteenth part we consider the case when the functions f, g, h are of arbitrary order in x, y, z .

20. In the twentieth part we consider the case when the functions f, g, h are of arbitrary order in x, y, z .
